(application filed on or after May 29, 2000)

The patent term adjustment to date is 97 days. If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the term adjustment will be 97 days.

If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system. (<http://pair.uspto.gov>)

Notice of Possible Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there may be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of any fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

Drawings

1. The drawings filed on 30 May 2001 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Allowable Subject Matter

2. Claims 1-24 are allowed.

3. Regarding claims 1-23, the claims are allowable over the prior art of record for at least the reason that the prior art fails to teach or to reasonably suggest wherein an arrayed waveguide grating device is comprised of a first slab coupler and a second slab coupler; a plurality of array waveguides optically coupled between the first and second couplers and having predetermined optical path length differences there between; a plurality of output waveguides optically coupled at the first ends thereof to an output side of the second slab coupler, for outputting different wavelength channel outputs therefrom; wherein the output waveguides are multi-mode waveguides; at least one of the output waveguides, along at least a portion of its length, is of a different width to at least one adjacent one of the output waveguides along an adjacent portion of the length thereof; and all of the output waveguides are of substantially equal width at the first ends thereof where they are optically coupled to the second slab coupler, as set forth in the claimed combination.

Art Unit: 2882

4. Regarding claim 24, the claim is allowable over the prior art of record for at least the reason that the prior art fails to teach or to reasonably suggest wherein an arrayed waveguide grating device is comprised of a first slab coupler and a second slab coupler; a plurality of array waveguides optically coupled between the first and second couplers and having predetermined optical path length differences there between; a plurality of output waveguides optically coupled at the first ends thereof to an output side of the second slab coupler, for outputting different wavelength channel outputs therefrom; wherein the output waveguides are multi-mode waveguides; at least one of the output waveguides, along at least a portion of its length, is of a different width to at least one adjacent one of the output waveguides along an adjacent portion of the length thereof; at least one of the output waveguides is tapered in width along an initial portion thereof, from the first end thereof; and the widths of the output waveguides where they are optically coupled to the second slab coupler are designed so as to achieve a substantially uniform passband over all the output wavelength channels of the device, as set forth in the claimed language.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Amersfoort (USPN 5,629,992) discloses an optical wavelength division multiplexing device wherein a single mode input waveguide is coupled to one end of a multi-mode waveguide, which is coupled to the first free space region, and whereby single mode output waveguides are connected to the second free space region, in order to produce flattened filter

profiles. However, the references lacks the specifics to the arrayed waveguide grating device have multi-mode output waveguides having at least one waveguide that has a different width than the other waveguides, as set forth in the claimed combination.

Okawa (USPN 6,069,990) discloses an optical wavelength multiplexer/demultiplexer, comprised of an input and output slab couplers, wherein the input waveguides are tapered and having a plurality of output waveguides. However, the references lacks the specifics to the arrayed waveguide grating device have multi-mode output waveguides having at least one waveguide that has a different width than the other waveguides, as set forth in the claimed combination.
